NSS 2015-2016 Club Descriptions

Science Olympiad

Science Olympiad club participates in competitions and occasionally sponsors other activities that promote science and science education. Our biggest competition is Science Olympiad. Science Olympiad is a science competition that involves a team of 13 students competing in 13 events that cover a range of science and engineering topics. There are lab centered events, events involve pencil and paper tests and events require that students build something ahead of time and bring it to the competition. Along with chemistry, physics, and biology, events will also test earth science, ecology and astronomy.

Recycling and Service Club

This club is all about helping others less fortunate than us, or those that just need a little encouragement. We will be coordinating the school's recycling program. We will also plan some donation competitions like a canned food drive or toys for the winter holidays. I am excited to help our school family. Please join me this year! I would love to have 3rd-5th grade students giving aid to others.

Chess Club

In countries where chess is offered widely in schools, students exhibit excellence in the ability to recognize complex patterns and consequently excel in math and science.

As a parent of three chess players I can say this statement is true **"Chess is in many ways like life itself." "It's all condensed in a playful manner in a game format and it's extremely fascinating because first of all I'm in control of my own destiny, I'm in charge. You have to be responsible for your actions, you make a move, you had better think ahead about what's going to happen, not after it happens, because then it's too late.**

Chess teaches discipline from a very early age. It teaches you to have a plan and to plan ahead. If you do that, you'll be rewarded; if you break the rules, you will get punished in life and in chess. You need to learn the rules to break the rules." - Susan Polgar, 4 time World Champion
